Remodelling the putting
surface of existing greens
photo montage - design study

Landscape construction
Rebuilding existing greens of
Golf Club Gatow/ Berlin 2004
Team member of golf course
construction unit

Scope of work

Our spectrum comprises all golf architectural services from masterplanning, golf course design and development to building construction.

As master planners we provide comprehensive planning services by bringing together the best specialists and combining their expertise. Our role is always the coordinating golf course architect and planner.

One golf course architect is the partner to the client during all project phases. Each project team works under the supervision of a project manager and is supported by quality managers in matters of implementation planning, tender activities, cost- and time-control, infrastructure and site-supervision, thus guarantying the standards and qualities which make our office very special.
